DETAILED ACTION

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 recites the limitation "paper towel tube" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Dewing (5,170,938).

Dewing shows an air freshener comprising a base (12) having scented material therein, an abutment connected to said base (14), and a guide (24), which accommodates a portion of a paper towel holder. The air freshener further comprises an installed position wherein the said abutment has an external surface in frictional contact with the internal surface of a paper towel roll (figure 4). Regarding claim 4, the abutment has a width sufficient to form a coupling with a paper towel tube with a portion of the abutment being disposed inside of the tube (figure 4). Regarding claim 6, the abutment (14) is tubular and an internal surface of the abutment forms a portion of the guide (24).

Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Terepin (3,771,883).

Terepin shows an air freshener comprising a base (14) having an inherently scented material therein, an abutment connected to said base (51), and a guide (figure 3), which accommodates a portion of a paper towel holder. The air freshener further including a first end wall (48A), a second end wall (30A), a side wall (36A), joining the first and second end walls, and a chamber formed by the first end wall, second end wall and the side wall.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Levett (649,062) in view of Reichert (6,531,145).

Levett shows an air freshener comprising a base (12) having an scented material therein (column 2, lines 6-15), an abutment connected to said base (11), and a guide (10), which accommodates a portion of a paper towel holder. However, Levett does not specifically disclose that the scented material is a plurality of scented beads. Reichert shows a cylindrical container including a plurality of scented beads (12). It would have been obvious to one of ordinary skill in the art at the time of the applicant's invention to use the scented beads (12) of Reichert for the scented material in Levett's invention in order to make the air freshener easily refillable.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Riley (1,552,082) shows a toilet paper roll holder that is also an air freshener. Grant (2,546,820) shows a paper and deodorant dispenser. Mayled (5,152,397) shows a container including scented material.
